# How do I increase the number of views my assignments get?

The simple answer to that is the **quality** of the assignment. Creating a high-quality assignment is a "win-win". The reader can easily determine whether they match the assignment, and this saves you a lot of time. You won't get applications from mis-matches.

*Ex. Meticulous .NET developer with test automation skills*

## Clear headline

What kind of role are you looking for? Does the freelancer/consultant need to have any special skills or personal characteristics?

## Elevator pitch

Write an elevator pitch that appeals to a freelancer/consultant. Make sure to include important information such as special skills that are required.

## More parameters

Add crucial information such as when the assignment is scheduled, what level of seniority is expected and the extent of the assignment.

## Rate

Rate is the most important bits of information you can supply, since a lot of freelancers/consultants base their decision to apply or not on it.
# How do I get more people to apply? (on my assignments)

## Reply frequency

Freelancers and consultants really appreciate when you reply to their applications. Brainville keeps track on how often you reply and displays it – we call it reply frequency.

## Company profile

Most people are curious and want to know who they're applying to. Showcase your company – start by adding your logotype and a short description of who you are.
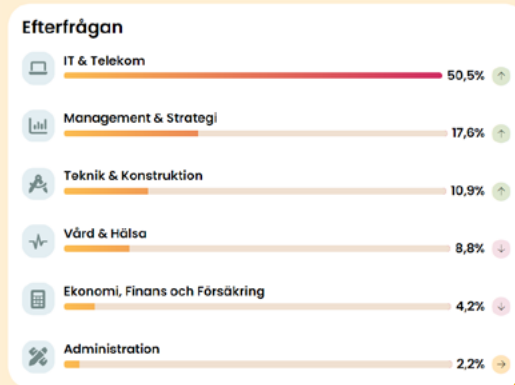

## Suggest a rate

We can see a connection between assignments with a suggested rate and both the number of received applications and the quality of the applications.

# Which industries use Brainville?

The majority of the freelances and consultants in Brainville work within **IT & Telekom** followed by **Management** and **Technology & Engineering**. These three make up almost 80 %.

Examples of industries on the rise in Brainville are Finance & Insurance, Healthcare, Administration, Legal & Procurement and HR.

# Can I redirect applicants to my web page?

No, we don't allow this anymore. Why?

Because our users want to be able to use Brainville to apply to all assignments. All their information is already here and ready to be sent. This saves them **a lot of time**.

Brainville compiles statistics every month based on all the assignments, applications, companies, and profiles. Check out Brainville Statistics

# Does Brainville take part of the deal?

No, never.
We put you in direct contact with experts, and let you settle deal, without us.

# Can I receive applications in my own system via API?

Yes, you can. Using our API you can integrate with us and at the same time get the approval of applicants to store their personal information in your system.

Read more about our APIs and plugins.
